(a) In matches for which a reserve day has been allocated, any rearrangement of the number of overs that may be necessary due to a delayed start or one or more interruptions in play as a result of adverse ground, weather or light conditions or any other reason, shall only be made on the final scheduled day of the match (i.e. the reserve day). The timing and duration of all suspensions of play (including all intervals) or delays on any day will be taken into account when calculating the length of time available for either innings. In all matches, the object shall always be to rearrange the number of overs so that both teams have the opportunity of batting for the same number of overs.

A minimum 25 overs have to be bowled to the side batting second to constitute a match. The calculation of the number of overs to be bowled shall be based on an average rate of 14.28 overs per hour in the total time available to play. If a reduction of the number of overs is required, any recalculation must not cause the match to be rescheduled to finish earlier than the original cessation time. This time may be extended to allow for one extra over for both teams to be added if required. See also Clause 12.6 below.

- (b) If the team fielding second fails to bowl the required number of overs by the scheduled cessation time, the hours of play shall be extended until the overs have been bowled or a result achieved.

- (b) If the team fielding first fails to bowl the required number of overs by the scheduled time for cessation of the first session, play shall continue until the required number of overs has been bowled.

12.5.3 Delay or Interruption to the innings of the Team Batting Second

If there is a suspension in play during the second innings, the overs shall be reduced at a rate of 14.28 overs per hour for time lost, except that, when the innings of the team batting first has been completed prior to the scheduled or rescheduled time for the interval between innings, the reduction of overs will not commence until an amount of time equivalent to that by which the second innings started early has elapsed. See also Clause 12.6 below.

12.6 Extra Time

In all matches without a reserve day there shall be allocated up to 30 minutes of extra official playing time to make up for any playing time lost. Refer 12.5.1(a) and 12.5.3.

In all matches with a reserve day, there shall be allocated up to 30 minutes (60 minutes for semi-finals and finals of main competition) of extra official playing time on the reserve day to make up for any playing time lost. Refer

12.5.1 (a) and 12.5.3. Provided that the said 30 minutes (60 minutes in case of semi-finals and final of main event) extra official playing time may be added to the first day in the event of the umpires considering that a result may be obtained on the first day if such extra time is played.

12.7 Number of Overs per Bowler

No bowler shall bowl more than 10 overs in an innings.

In a delayed or interrupted match where the overs are reduced for both teams or for the team bowling second, no bowler may bowl more than one-fifth of the total overs allowed.

Where the total overs is not divisible by 5, one additional over shall be allowed to the maximum number per bowler necessary to make up the balance.

In the event of a bowler breaking down and being unable to complete an over, the remaining balls will be allowed by another bowler. Such part of an over will count as a full over only in so far as each bowler's limit is concerned.

The scoreboard shall show the total number of overs.

Law 21.3 shall apply and in addition:

In the event that a team refuses to play and the umpires awarding the match to the other side in accordance with this Law, the calculation of the defaulting team's run rate shall be affected in the manner as determined according to the provisions of 21.9.5 below.

21.4 Law 21.4 A Tie

- Law 21.4 shall apply in addition to the following:
- 21.4.1 If the scores are equal, the result shall be a tie and no account shall be taken of the number of wickets, which have fallen.

21.5 Law 21.5 A Draw

Law 21.5 shall not apply.

21.6 Prematurely Terminated Matches – Calculation of the Target Score

21.6.1 Interrupted Matches – Calculation of the Target Score

If, due to suspension of play after the start of the match, the number of overs in the innings of either team has to be revised to a lesser number than originally allotted (minimum of 25 overs), then a revised target score (to win) should be set for the number of overs which the team batting second will have the opportunity of facing. This revised target is to be calculated using the current Duckworth/Lewis method. The target set will always be a whole number and one run less will constitute a Tie. (Refer Appendix 2)

21.6.2 Prematurely Terminated Matches

If the innings of the side batting second is suspended (with at least 25 overs bowled) and it is not possible for the match to be resumed, the

match will be decided by comparison with the D/L 'Par Score' determined at the instant of the suspension by the Duckworth/Lewis method (refer Appendix 2). If the score is equal to the par score, the match is a Tie. Otherwise the result is a victory, or defeat, by the margin of runs by which the score exceeds, or falls short of, the Par Score.

21.7 Correctness of result

Any query on the result of the match as defined in Laws 21.2, 21.3, 21.4, 21.8 and 21.10 (as modified by these regulations) shall be resolved as soon as possible and a final decision made by the umpires at close of play.

21.8 Competition Format

The 16 participating nations have been divided into four separate groups consisting of four teams each as follows:

Group A	Group B	Group C	Group D
Australia Sri Lanka	South Africa England	India New Zealand	West Indies Pakistan
Zimbabwe	Nepal	Bangladesh	PNG
Canada	Uganda	Scotland	Ireland

Each team will play every other team in its group once.

At the end of the group matches the top two teams from each group will progress to the Super League and the bottom two teams from each group will play in the Plate competition.

In the Super League stage of the competition, the teams will be placed in two groups as follows:

Super League 1	Super League 2
1 st Group A 2 nd Group B 1 st Group C 2 nd Group D	2 nd Group A 1 st Group B 2 nd Group C 1 st Group D

Each team in both of the Super League groups will play every other team in its Super League group once.

In the Plate competition, the teams will be placed in two groups as follows:

Plate 1	Plate 2	
3 rd Group A	4 th Group A	
3 rd Group B	4 th Group B	
4 th Group C	3 rd Group C	
4 th Group D	3 rd Group D	

Each team in both of the Plate League groups will play every other team in its Plate League group once.

The top two teams from each Super League will qualify for the Super League semi finals. The winner of Super League 1 will play the runner up of Super League 2. The runner up of Super League 1 will play the winner of Super League 2.

The top two teams from each Plate League will qualify for the Plate competition semi finals. The winner of Plate 1 will play the runner up of Plate 2. The runner up of Plate 1 will play the winner of Plate 2.

The winners of the Super League semi-finals will contest the ICC U19 Cricket World Cup Final.

The winners of the Plate competition semi-finals will contest the Plate competition final.

21.9 Points

The following points system will apply to the group matches, Super League matches and Plate competition:

Win	2
Tie or No Result	1
Loss	0

21.9.1 Group Matches

Points accumulated in the group matches are not carried forward to the Super or Plate Leagues.

In the event of teams finishing on equal points within their respective group, the order of finishing will be determined as follows:

- a) The team with the most number of wins in the Group Matches will be placed in the higher position.
- b) If there are teams with equal points and equal wins in the Group Matches then in such case:
 - When two teams have both equal points and equal wins, the team which was the winner of the Group Match played between them will be placed in the higher position. If the match played between them was a Tie or No Result, then the team with the higher net run rate in the Group Matches will be placed in the higher position.

However,

 When there are three or more teams with both equal points and equal wins in the Group Matches, then the team(s) which was (were) the winner of the most number of matches played between those equal teams in the Group Matches will be placed in the higher position(s). If after applying this criterion there are any teams which are still equal then such equal teams shall be ranked according to their net run rate in the Group Matches (refer to 21.9.5 below for the calculation of net run rate).

- c) If following the net run rate calculation above there are teams which are still equal, then the team with the higher number of wickets taken per balls bowled in the Group Matches in which results were achieved will be placed in the higher position.
- d) In the highly unlikely event that teams cannot be separated by the above this will be done by drawing lots.

21.9.2 Super and Plate Leagues

In the event of teams finishing on equal points within their respective league groups, the order of finishing will be determined as follows:

- a) The team with the most number of wins in the Super or Plate League matches (as the case may be) will be placed in the higher position.
- b) If there are teams with equal points and equal wins in the Super or Plate League matches then in such case:
 - When two teams have both equal points and equal wins, then the team which was the winner of the Super or Plate League match played between them will be placed in the higher position. If the match played between them was a Tie or No Result, then the team with the higher net run rate in the Super or Plate League Matches only (not the group matches) will be placed in the higher position.

However,

- When there are three or more teams with both equal points and equal wins in the Super or Plate League matches, then the team(s) which was (were) the winner of the most number of matches played between those equal teams in the Super or Plate League matches will be placed in the higher position(s). If after applying this criterion there are any teams which are still equal then such equal teams shall be ranked according to their net run rate in the Super or Plate League matches (not the Group Matches).
- c) If following the net run rate calculation above, there are teams which are still equal, (i.e. they have the same net run rate in the Super or Plate League matches) then the team with the most number of points scored in the Group Matches will be placed in the higher position.

- d) In the unlikely event that teams are still equal, the team with the higher net run rate in the Group Matches (not the Super or Plate League matches) will be placed in the higher position.
- e) If all of the Super or Plate League matches are 'No Result', the four teams which finished top of each of the four groups in the Group Matches will proceed to the semi-finals. The four teams that finished in third place in each of the four groups in the Group Matches will proceed to the semi-finals of the Plate competition.

21.9.3 Semi-final

If a semi-final is tied or there is no result, the team that finished higher in the Super or Plate League matches as decided by clause 21.9.2 shall proceed to the final.

21.9.4 Final

In the event of a tied final or there is no result, the teams will be declared joint winners.

21.9.5 Net Run Rate

A team's net run rate is calculated by deducting from the average runs per over scored by that team throughout the relevant portion of the competition, the average runs per over scored against that team throughout the relevant portion of the competition.

In the event of a team being all out in less than its full quota of overs, the calculation of its net run rate shall be based on the full quota of overs to which it would have been entitled and not on the number of overs in which the team was dismissed.

Only those matches where results are achieved will count for the purpose of net run rate calculations. Where a match is abandoned, but a result is achieved under Duckworth/Lewis, for net run rate purposes Team 1 will be accredited with Team 2's Par Score on abandonment off the same number of overs faced by Team 2. Where a match is concluded but with Duckworth/Lewis having been applied at an earlier point in the match, Team 1 will be accredited with 1 run less than the final Target Score for Team 2 off the total number of overs allocated to Team 2 to reach the target.

In circumstances where a match (and the points for such match) is awarded to a team as a result of the other team's refusal to play, either by the umpires in accordance with Law 21.3 (a)(ii) or in accordance with the provisions of the relevant event agreements signed by the participating teams, the net run rate of the defaulting team shall be affected in that the full 50 overs of the defaulting team's innings in such forfeited match shall be taken into account in calculating the average runs per over of the defaulting team over the course of the relevant portion of the competition. For the avoidance of doubt the runs scored and overs bowled in such forfeited match will not be taken

into account when calculating the net run rate of the team to whom the match was awarded.

22. LAW 22 THE OVER

Law 22 shall apply subject to the addition of the following to Law 22.5:

22.1 Law 22.5 Umpire miscounting

25.1 Law 25.1 Judging a Wide

Law 25 shall apply with the following addition to Law 25.1:

Umpires are instructed to apply very strict and consistent interpretation in regard to this Law in order to prevent negative bowling wide of the wicket.

Any offside or legside delivery which in the opinion of the umpire does not give the batsman a reasonable opportunity to score shall be called a wide.

A penalty of one run for a wide shall be scored. This penalty shall stand in addition to any other runs which are scored or awarded. All runs, which are run or result from a wide ball, which is not a no ball, shall be scored wide balls.

In addition to Law 41.1:

The exchanging of protective equipment between members of the fielding side on the field shall be permitted provided that the umpires do not consider that it constitutes a waste of playing time.

41.2 Restriction of the Placement of Fieldsman

- 41.2.1 Two semi circles shall be drawn on the field of play. The semi circles have as their centre the middle stump at either end of the pitch. The radius of each of the semi circles is 30 yards (27.43 metres) by a straight line drawn on the field on the same side of the pitch. The field restriction area should be marked by continuous painted white lines or 'dots' at 5 yard (4.57 metres) intervals, each 'dot' to be covered by a white plastic or rubber (but not metal) disc measuring 7 inches (18cm) in diameter.
- 41.2.2 At the instant of delivery, there may not be more than five fieldsmen on the leg side.
- 41.2.3 For the first 15 overs only two fieldsmen are permitted to be outside the field restriction marking at the instant of delivery.
- 41.2.4 For the remaining overs only five fieldsmen are permitted to be outside the field restriction marking at the instant of delivery.

The radius of each of the circles is 15 yards (13.72 metres). The field restriction area should be marked by 'dots'. The segment of the circles reserved for the slip positions shall not be demarcated. (Refer attached Appendix 1). In the first 15 overs there must be a

minimum of two stationary fieldsmen within the 15 yards (13.72 metres) field restriction of the striker at the instant of delivery. When a fast bowler is bowling the two stationary fieldsmen may be permitted to stand deeper than 15 yards (13.72 metres) (in the undemarcated area) provided only that they are standing in slip, leg slip and gully positions.

41.3.6 In circumstances where the number of overs for the team batting first is reduced, the number of overs in regard to the restrictions in Clauses 41.2.3 and 41.2.5 above shall be reduced proportionally in a ratio of 15:50 (30%) in accordance with the table below. Fractions are to be ignored in all calculations re the number of overs.

in

Total overs	No. of overs for which fielding restrictions
in innings	Clauses 41.2.3 and 41.2.5 above will apply
25-26	7
27-29	8
30-33	9
34-36	10
37-39	11
40-43	12
44-46	13
47-49	14
50	15

- 41.2.7 Where the number of overs for the team batting second is reduced, the restrictions in Clauses 41.2.3 and 41.2.5 above will apply for the same proportion of the second innings as applied in the first innings (fractions to be ignored).
- 41.2.8 In the event of an infringement of any of the above fielding restrictions, the square leg umpires shall call and signal 'No Ball'.

42. LAW 42 FAIR AND UNFAIR PLAY

42.1 Law 42.3 The Match Ball – changing its condition

Law 42.3 shall apply, subject to the following:

- 42.1.1 Law 42.3 (e) (ii) shall be replaced with the following:
 - (a) Inform the captain of the fielding side of the reason for the action taken.
- 42.1.2 And in addition to Law 42.3:
 - (a) The Umpires shall report the incident to the ICC Match Referee under the ICC Code of Conduct.
 - (b) In the event that a ball has been interfered with and requires replacement the batsman at the wicket shall choose the replacement ball from a selection of six other balls of various

degrees of usage (including a new ball) and of the same brand as the ball in use prior to the contravention.

- (c) The umpire at the bowlers end shall advise the bowler and the batsman on strike when each fast short pitched delivery has been bowled.
- (d) In addition, for the purpose of this regulation and subject to Clause 42.4.1 (f) below, a ball that passes above head height of the batsman, that prevents him from being able to hit it with his bat by means of a normal cricket stroke shall be called a wide.
- (e) For the avoidance of doubt any fast short pitched delivery that is called a wide under this playing condition shall also count as the allowable short pitched delivery in that over
- (f) In the event of a bowler bowling more than one fast short-pitched delivery in an over as defined in Clause 42.4.1 (b) above, the umpire at the bowlers end shall call and signal no ball on each occasion. A differential signal shall be used to signify a fast short pitched delivery. The umpire shall call and signal "no ball" and then tap the head with the other hand.
- (g) If a bowler delivers a second fast short pitched ball in an over, the umpire, after the call of no ball and when the ball is dead, shall caution the bowler, inform the other umpire, the captain of the fielding side and the batsmen at the wicket of what has occurred. This caution shall apply throughout the innings.

- (h) If there is a second instance of the bowler being no balled in the innings for bowling more than one fast short pitched delivery in an over, the umpire shall advise the bowler that this is his final warning for the innings.
- (i) Should there be any further instance by the same bowler in that innings, the umpire shall call and signal no ball and when the ball is dead direct the captain to take the bowler off forthwith. - (k) The umpire will report the occurrence to the other umpire, the batsmen at the wicket and as soon as possible to the captain of the batting side.
- (1) The umpires will then report the matter to the ICC Match Referee who shall take such action as is considered appropriate against the captain and the bowler concerned. (Refer also to Law 42.1 Fair and Unfair Play Responsibility of the Captains.)

The above is not a substitute for Clause 42.5 below which umpires are able to apply at any time.

42.4.2 Law 42.6 (b) Bowling of High Full Pitched Balls

Law 42.6 (b) shall be replaced by the following:

- (c) In the event of a bowler bowling a high full pitched ball as defined in Clauses 42.4.2 (a) and 42.4.2 (b) above (i.e. a beamer), the umpire at the bowler's end shall, in the first instance, call and signal no ball and when the ball is dead, caution the bowler and issue a first and final warning. The umpire shall inform the other umpire, the captain of the fielding side and the batsmen at the wicket of what has occurred.

- shall neither have bowled the previous over, or part thereof, nor be allowed to bowl the next over, or part thereof.
- (e) The bowler thus taken off shall not be allowed to bowl again in that innings.
- (f) The umpire will report the occurrence to the other umpire, the batsman at the wicket and as soon as possible to the captain of the batting side.
- (g) The umpires will then report the matter to the ICC Match Referee who shall take such action as is considered appropriate against the captain and the bowler concerned. (Refer also to Law 42.1 Fair and Unfair Play Responsibility of the Captains.)

42.5 Law 42.7 Dangerous and Unfair Bowling – Action by the umpire

Law 42.7 shall be replaced by the following:

Regardless of any action taken by the umpire as a result of a breach of Clauses 42.4.1, 42.4.2 and 42.6 the following shall apply at any time during the match.

- 42.5.1 The bowling of fast short pitched balls is unfair if in the opinion of the umpire at the bowler's end he considers that by their repetition and taking into account their length, height and direction, they are likely to inflict physical injury on the striker, irrespective of the protective clothing and equipment he may be wearing. The relative skill of the striker shall also be taken into consideration.
- 42.5.2 In the event of such unfair bowling, the umpire at the bowler's end shall adopt the following procedure:
 - (a) In the first instance the umpire shall call and signal no ball, caution the bowler and inform the other umpire, the captain of the fielding side and the batsmen of what has occurred.
 - (b) If this caution is ineffective, he shall repeat the above procedure and indicate to the bowler that this is a final warning.
 - (c) Both the above caution and final warning shall continue to apply even though the bowler may later change ends.
 - (d) Should there be any further instance by the same bowler in that innings, the umpire shall call and signal no ball and when the ball is dead direct the captain to take the bowler off forthwith. If necessary, the over shall be completed by another bowler, who shall neither have bowled the previous over, or part thereof, nor be allowed to bowl the next over, or part thereof. See Law 22.8. (Bowler Incapacitated or Suspended during an Over).
 - (e) The bowler thus taken off shall not be able to bowl again in that innings.

- (f) The umpire will report the occurrence to the other umpire, the batsmen at the wicket and as soon as possible to the captain of the batting side.

The umpire at the bowlers end shall:

- 42.6.1 Call and signal no ball.
- 42.6.2 When the ball is dead, direct the captain to take the bowler off forthwith.
- 42.6.3 Not allow the bowler to bowl again in that innings.
- Ensure that the over is completed by another bowler, provided that the bowler does not bowl two overs or part thereof consecutively.
- 42.6.5 Report the occurrence to the other umpire, to the captain of the batting side and the ICC Match Referee who shall take such action as is considered appropriate against the captain and the bowler concerned. (Refer also to Law 42.1 Fair and Unfair Play Responsibility of the Captains).

42.7 Action by the umpires for dangerous and unfair Bowling

Should the umpires initiate the caution and warning procedures set out in Clauses 42.4.1, 42.4.2 42.5 and 42.6 such cautions and warnings are not to be cumulative.

42.8 Law 42.9 Time Wasting by the Fielding Side

Duckworth/Lewis Method of Re-calculating the Target Score in an Interrupted Match.

The Professional Edition of the Duckworth/Lewis shall be used in all matches. If any match is suspended after it has started such that the number of overs available to be faced by either side is reduced from that determined when the match started, the revised target shall be computed using the computer software CODA 6.0 (or later releases) in accordance with the instructions provided with that software and displayed on the screen.

On completion of the innings of the side batting first, a print-out should be obtained of the resources table (over-by-over) appropriate to the innings.

In the event of computer malfunction when no revised D/L target has already been set, then the D/L method as used prior to October 2003, referred to as the 'Standard Edition', should be used.

In the event of computer malfunction after a revised D/L target has been set using the Professional Edition, any further revised target due to a further suspension in play shall be calculated manually using the over-by-over resources table which has been printed. If the suspension occurs mid-over, the resource percentages appropriate to the instant of suspension shall be calculated by linear interpolation between the figures given for the nearest whole numbers of overs, above and below, rounded to the nearest one-tenth of a percent.

In the regulations given below, the tables given (including the ball-by-ball ones) and used in the illustrative examples, relate to the Standard Edition. These tables should be substituted by those appropriate to the particular match, which can be produced as directed within the software for the Professional Edition.

1. Introduction

The D/L method sets revised targets in rain-interrupted limited-overs matches in accordance with the relative run scoring resources which are at the disposal of the two sides.

These are not in direct proportion to the number of overs available to be faced, as with the average run rate method of correction. Instead they depend on how many overs are to go and how many wickets are down when the interruptions occur.

To calculate the revised targets, you need to know the resources available at the stage of the match when suspensions and resumption of play occur. All possible values of resources have been pre-calculated and these are listed in the accompanying table.

The table covers each individual ball in a game of up to 50-overs per side. The figures given in the table are percentages of the resources available for a complete 50-over innings.

For matches with less than 50-overs per innings before they start, the resource percentages available at the start of an innings will be less than 100%. But the same table and the same method of calculation are used whatever the number of overs per innings.

The single sheet over-by-over version of the table can be used for cases when play is suspended before the start of a new over.

When Team 2 (the side batting second) have less run scoring resources at their disposal than had Team 1 (the side batting first), their target is adjusted downwards using the ratio of the resources available to the two sides.

But when Team 1's innings has been interrupted, it often happens than Team 2 have more resources at their disposal than had Team 1 and it is now necessary to adjust Team 2's target upwards. In this case the adjustment is based on the runs that would be expected to be scored on average from the extra resources at the disposal. The number of these extra runs required is calculated by applying the excess resource percentage to the average total score in a 50-over innings, referred to here as **G50**

For matches involving ICC full member nations or for matches between teams that play first class cricket, the value of **G50** to be used at present (at least until 2004) is 235. For lower levels of the game, **G50** should be chosen to represent the average score expected from the team batting first in an uninterrupted 50 overs-per-innings match. For teams between associate ICC member nations, the recommended value of **G50** is 190; for women's ODIs, the recommended value is 175. For U15 internationals, the recommended value is 200. For other levels of the game, advice should be sought from the ICC.

2. Definitions

- The team batting first are referred to as 'Team 1' and the team batting second are referred to as 'Team 2'.
- In the table decimal fractions of an over are expressed in standard cricket notation i.e. 4.3 overs means 4 overs plus 3 balls.
- The terms 'target' and 'revised target' are reserved exclusively for the minimum score Team 2 need to win.
- As with an uninterrupted match, if Team 2 make a score which is one run short of the target, the match is tied.

The following symbols are used throughout:

- **N** is the number of overs per innings for the match as decided at the moment of delivery of the first ball of the match.
- **N1** is the number of overs Team 1 have had the opportunity of facing during their innings (which may not be a whole number).
- **S** is Team 1's total score
- **R1** is the resource percentage (relative to a full 50-over innings) available to Team 1.
- **R2** is the resource percentage (relative to a full 50-over innings) available to Team 2.
- **RP** is the resource percentage (relative to a full 50-over innings) lost by Team 2 as a penalty for slow bowling.
- T is Team 2's target score.

3. Calculation of the Percentage Resource Lost by a Suspension in Play

To compensate for any loss of overs due to a suspension in play during either Team 1's or Team 2's innings, it is necessary first to calculate the resource percentage that has been lost on account of this suspension.

If the suspension occurs between overs, use the sheet of the table which gives the figures for whole numbers of overs. If it occurs mid-over, use the sheets of the table which provide the figures for each individual ball.

- **3.1** For the start of the suspension in play, from the table note the resource percentage that remained for the appropriate number of overs/ball left and wickets lost.
- **3.2** For the resumption of play after the suspension, from the table note the resource percentage now remaining for the revised number of overs/balls left and for the same number of wickets lost.
- **3.3** Subtract the resource percentage in **3.2** from that in **3.1** to give the resource percentage lost.
- **3.4** If a suspension in play causes the innings to be terminated, the resource percentage on resumption (3.2) is zero and the percentage lost is the resource percentage which was remaining when the suspension occurred (3.1).
- **3.5** If more than one suspension in play occurs, the resource percentages lost are calculated as described in 3.1 to 3.4 and are accumulated to give updated values for the total resource percentage lost or resource available for the innings. This is done after each suspension as described in 5.2 and 5.5.

4. Penalties for Slow Over Rates

No overs penalties are imposed for slow over rates and hence slow over rates have no effect on revised target calculations.

5. Calculation of Revised Targets

- **5.1** Note the number of overs per innings decided at the start of the game, N. From the table note the resource percentage available to Team 1 at the start of their innings. (For N = 50 this is 100%.)
- **5.2** For all suspensions and any premature termination of Team 1's innings, calculate the total resource percentage lost using the procedure described in section 3. Subtract this from the starting resource percentage (**5.1**) to give **R1**, the resource which was available to Team 1 for their innings. Note Team 1's total score, **S**.
- **5.3** There is no overs penalty for slow over rates by either side.
- 5.4 Note the number of overs allocated to Team 2 at the start of their innings and from the table note the resource percentage for this number of overs remaining and 0 wicket lost. This is **R2**, the resource percentage available to Team 2. If **R2** differs from **R1**, which will happen if Team 1's innings was interrupted and/or Team 2's was delayed, a revised target must be set. Calculate this revised target, **T**, as described in 5.6 below.
- 5.5 For each suspension of play during Team 2's innings or for premature termination of the match, update the resource percentage available, R2, by subtracting the resource percentage lost calculated as in section 3. Calculate the revised target, T, after each suspension as described in 5.6 below. If the match has to be terminated, the result is decided by comparing Team 2's score at the time with the 'par score', this being the revised target, calculated as in 5.6 below, less one run. If it is greater, Team 2 win. If it is equal, the match is tied. If it is less, Team 1 win.
- **5.6** If **R2** is less than **R1**, Team 2's revised target is obtained by reducing Team 1's score **S** in the ratio of **R2** to **R1**, ignoring any figures after the decimal point, and adding one run,
 - i.e. $T = (S \times R2/R1) + 1$ (rounded down to a whole number, if necessary).

If **R2** is equal to **R1**, no revision is needed and Team 2's target is one more run than Team 1's score.

i.e.
$$T = S + 1$$

If R2 is greater than R1, calculate the amount of excess R2 - R1, and take this percentage of the average 50-over total, G50, to give the extra runs needed, ignoring any figures after the decimal point.

i.e. $T = S + (R2 - R1) \times G50/100 + 1$ (rounded down to a whole number, if necessary)

6. Penalty Runs

6.1 During Team 1's innings

If penalty runs are awarded to the batting side, then their score shall advance accordingly and be taken into account when performing any future D/L calculation.

If penalty runs are awarded to the fielding side, then any D/L calculation in between innings will be performed as normal, and their innings will commence with the score equivalent to the number of penalty runs that they have been awarded.

6.2 During Team 2's innings

If penalty runs are awarded to the batting side, then their score shall advance accordingly. These penalty runs do not affect any subsequent D/L calculation.

If penalty runs are awarded to the fielding side, then there will be no recalculation of any D/L target. Instead, the target score and the entire schedule of par scores will advance by the appropriate number of penalty runs. If a loss of overs occurs after such a penalty has been awarded, then the D/L target will be calculated based upon the original score of the side batting first, and this target, and all par scores, will then be raised by the appropriate number of penalty runs

7. The Result and its Description

When a revised target has been calculated and the match has been played out to its completion, the result is described exactly as in the case of an uninterrupted match; if Team 2 achieve their revised target they win by the number of wickets they have in hand when they reach this score; if they fall

short of their revised target by exactly one run the result is a tie, and if they make a lower score Team 1 win by the margin of runs by which Team 2 fall short of the score needed to achieve a tie.

When a match has to be abandoned with Team 2's innings in progress (provided sufficient overs have been bowled to constitute a viable match), the result is decided by comparing Team 2's score with the 'par score' as defined in **5.5**and the winning margin is described in terms of the number of runs by which their score differs from the 'par score', regardless of whether Team 1 or Team 2 are the victors.

Whenever a completed game has involved the use of the D/L method, the description should be qualified by appending '(D/L method)'.

7.1 Examples of result description:

- (i) Team 2 are set a revised target of 186. But they only succeed in making 180 in their allocation of overs. They thus fall 5 runs short of the 185 runs needed to tie the match and the result is described as 'Team 1 win by 5 runs (D/L method)'.
- (ii) Team 2 are chasing a target of 201 in a 50-over per innings match and reach 115/4 after 30 overs when rain causes the match to be abandoned. At this point the 'par score' is 110. Team 2 have exceeded this by 5 runs and so the result is described as 'Team 2 win by 5 runs (D/L method)'.

Example 1 (Suspension during Team 1's innings)

In a 50 over-per-innings match, Team 1 reaches 79/3 after 20 overs and then there is a suspension in play. It is decided that 20 overs of the match should be lost, 10 of these by each team. Team 1 resumes to reach a final total of 180 in its revised allocation of 40 overs.

Number of overs per innings at the start of match, N = 50

Resource percentage available to Team 1 at start of innings = 100% (5.1)

Resource percentage remaining at suspension (30 overs left, 3 wkts lost = 61.6% (3.1)

Resource percentage remaining at resumption (20 overs left, 3 wkts lost) = 49.1% (3.2)

Resource percentage lost due to suspension = 61.6 - 49.1 = 12.5% (3.3)

Resource percentage available to Team 1, $\mathbf{R1} = 100 - 12.5 = 87.5\%$ (5.2)

Number of overs available to Team 2 at the start of its innings = 40

Resource percentage available (40 overs left, 0 wkt lost), $\mathbf{R2} = 89.3\%$ (5.4)

R2 is greater than **R1**, i.e. Team 2 has more resource available than had Team 1, so its target should be increased. S = 180

Team 2's revised target (5.6) is

 $T = S + G50 \times (R2 - R1)/100 + 1 = 180 + 235 \times (89.3 - 87.5)/100 + 1 = 185$ (rounded down).

Example 2 (delay to start of Team 2's innings)

In an English National League match (45 overs per innings), Team 1 scores 212 in its allocated 45 overs. Rain then causes Team 2's response to be delayed and it is decided that it should be shortened to 35 overs.

Number of overs at start of match, N = 45.

Resource percentage available to Team 1 at start of its innings (45 overs left, 0 wkt lost) = 95.0% (5.1).

The innings was not interrupted, so R1 = 95.0%

Number of overs available to Team 2 at start of its innings = 35

Resource percentage available to Team 2 at start of innings (35 overs left, 0 wkt lost) $\mathbf{R2} = 82.7\%$ (5.4)

R2 is less than **R1**; S = 212

Team 2's revised target (5.6) is

 $T = S \times R2/R1 + 1 = 212 \times 82.7/95.0 + 1 = 185$ (rounded down).

Example 3 (suspension during Team 2's innings)

In an One Day International match (50 overs per innings), Team 1 has scored 250 from its allocation of 50 overs in an uninterrupted innings. Team 2 has received 12 overs and has scored 40/1. Then play is suspended and 10 overs are lost.

Number of overs at start of match, N = 50.

Team 1's innings was uninterrupted, so its resource percentage available, R1 = 100% (5.1).

Resource percentage available to Team 2 at start of innings = 100% (5.4).

Resource percentage remaining at suspension (38 overs left, 1 wkt lost) = 82.0% (3.1).

Resource percentage remaining at resumption (28 overs left, 1 wkt lost) = 68.8% (3.2).

Resource percentage lost due to suspension = 82.0 - 68.8 = 13.2% (3.3).

Resource percentage available to Team 2, $\mathbf{R2} = 100 - 13.2 = 86.8\%$ (5.5).

R2 is less than **R1**; S = 250.

Team 2's revised target (5.6) is

 $T = S \times R2/R1 + 1 = 250 \times 86.8/100 + 1 = 218$, and it needs a further 178 runs from 28 overs.

Example 4 (multiple suspensions and abandonment)

Suppose that in Example 3, play continues for a further 10 overs during which Team 2 takes its score on to 98/3, whereupon there is another suspension in play and 2 more overs are lost. A further 8.2 overs are bowled and Team 2 is 154/6 when rain washes out the match.

Team 1's resource percentage is still R1 = 100%.

Team 2's resource percentage has been reduced further.

Resource percentage remaining at start of second suspension (18 overs left, 3 wkts lost) = 45.9% (3.1).

Resource percentage remaining at end of second suspension (16 overs left, 3 wkts lost) = 42.3% (3.2).

Resource percentage lost due to second suspension = 45.9 - 42.3 = 3.6% (3.3).

Resource percentage available to Team 2, $\mathbf{R2} = 86.8 - 3.6 = 83.2\%$ (5.5).

R2 is less than **R1**; S = 250.

Team 2's revised target (5.6) is

 $T = S \times R2/R1 + 1 = 250 \times 83.2/100 + 1 = 209$ and it needs a further 111 runs from 16 overs.

When the innings had to be terminated, there were 7.4 overs remaining.

Resource percentage remaining at termination of Team 2's innings (7.4 overs left, 6 wkts lost) = 19.4%.

This remaining resource is lost by the termination.

Resource percentage available to Team 2, $\mathbf{R2} = 83.2 - 19.4 = 63.8\%$ (5.5).

R2 is less than **R1**; S = 250.

Team 2's revised target (5.6) is

 $T = S \times R2/R1 + 1 = 250 \times 63.8/100 + 1 = 160$ (rounded down); the par score at the instant of the abandonment is 159 and with a score of 154 it has lost by 5 runs.

Team 1 wins by 5 runs (D/L method) (6).

Example 5 (suspension and termination of Team 1's innings mid-over and delay to Team 2's innings)

This is taken form an actual ODI: India (Team 1) versus Pakistan (Team 2), Singapore, April 1996. Team 1 scores 226/8 in 47.1 of a scheduled 50 overs. Rain then terminates Team 1's innings and delays that of Team 2, which is given a reduced allocation of 33 overs.

Number of overs per innings at start of match, N = 50

Team 1's innings:

Resource percentage at start of innings is 100% (5.1).

Resource percentage remaining at termination (2.5 overs left, 8 wkts lost) = 6.9% (3.1).

Resource percentage lost due to termination = 6.9% (3.4).

Resource percentage available, $\mathbf{R1} = 100 - 8.1 = 93.1\%$ (5.2).

Team 2's innings (allocated 33 overs):

Resource percentage available at star to f innings (33 overs left, 0 wkts lost), $\mathbf{R2} = 79.8\%$ (5.4).

R2 is less than **R1**; S = 226.

Team 2's revised target (5.6) is

 $T = S \times R2/R1 + 1 = 226 \times 79.8/93.1 + 1 = 194$ (rounded down).

Example 6 (as Example 5 but with a further interruption during Team 2's innings)

In the match of the previous example, Team 2 has scored 140 for 2 after 25 overs when a further 5 overs are lost to the weather.

Team 1's resource percentage is still R1 = 93.1%.

Team 2's innings:

Resource percentage at start of innings (33 overs left, 0 wkt lost) = 79.8% (5.4).

Resource percentage remaining at suspension (8 overs left, 2 wkts lost) = 25.5% (3.1).

Resource percentage remaining at resumption (3 overs left, 2 wkts lost) = 10.4 % (3.2).

Resource percentage lost due to suspension = 25.5 - 10.4 = 15.1% (3.3).

Resource percentage available, $\mathbf{R2} = 79.8 - 15.1 = 64.7\%$ (5.2).

R2 is less than **R1**; S = 226.

Team 2's revised target (5.6) is

 $T = S \times R2/R1 + 1 = 226 \times 64.7/93.1 + 1 = 158$ (rounded down) and it needs a further 18 runs from 3 overs.
